Brand New Book ***** Print on Demand *****.Excerpt from The Microscope and Its Relation to Medicine and Pharmacy, Vol. 2: April, 1882 Many of those require neither preparation nor mounting, being too common or abundant to repay the slightest labor bestowed upon them. Others, however - and their same is legion - can and should be preserved in some permanent manner, readily accessible, and easily arranged for examination. In the vegetable kingdom we are presented with an endless and charming variety of beautiful forms in the seeds of even our commonest flowers, or even weeds, whilst the feathers, scales and hairs of the animal afford a never ending storehouse of treasures for the seeker after the curious and beautiful. The pollen from the tinniest flower, or the sands from the shores of the mighty ocean, alike present us forms and colors of surpassing beauty; and the preservation of these in a permanent form is at times most desirable. It shall be the purport of the present paper to point out some plain methods of doing so, which will produce good results if carefully followed....
