Excerpt: .and these lards may have been made partly of cotton oil stearin. When a lard crystal presents its edge to observation it may readily escape identification, or may even be mistaken for a crystal of beef fat. In order to insure a side view the cover glass should be pressed down with a slight rotatory movement, whereby some of the lard crystals at least may be made to present a side view. 333. Observation of Fat Crystals with Polarized Light.--The appearance of fat crystals, when observed by means of polarized 55 Division of Chemistry, Bulletin 13, Part 1, 1887: 452, 29 et seq. light alone or with the adjunct of a selenite plate, is often of value in distinguishing the nature and origin of the sample.56 Every fat and oil which is amorphous will present the same set of phenomena when observed with polarized light...
