RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 130 pages. Original publisher: Portland, Or. : U. S. Dept. of the Interior, U. S. Geological Survey ; Denver, CO : U. S. Geological Survey, Branch of Information Services distributor, 2003. OCLC Number: (OCoLC)53116586 Subject: Water quality -- Oregon -- Clackamas River Watershed. Excerpt: . . . Nitrogen concentrations in these and other discharges from wastewater treatment plants and streams in the upper basin, however, were mostly fish hatcheries. Nonpoint sources, including soil below laboratory reporting levels (5 g L). In erosion, fertilizers, nitrogen-fixing plant species, contrast, streams draining the middle Clackamas atmospheric deposition, field burning, and live-Basin, including Clear Creek, Eagle Creek, and stock, also may contribute to enriching streams the North Fork of the Clackamas River, showed with nutrients. Another potentially important the opposite pattern, with relatively high concentration of nutrients is ground water, which was shown to contain high levels of nitrogen and concentrations of phosphorus. The nitrate concentrations in phosphorus. Although the quantity of ground these basins ranged from 43 to 206 g L in July, water entering the Clackamas River was not significantly exceeding the...
