But are such experiences a real biological illness or brain disease? Are they caused by a chemical imbalance or genetic defect? And what does the mind have to do with a mental illness/disorder/disease? Following a life changing experience and spiritual awakening Tim entered university to study psychology, intent on gaining a better understanding of his own madness and the mind, and to help others with what he had learned. The Map of the Psyche: The Truth of Mental Illness is the result of four years of research and over a decade of personal experience with mental illness. He had to be mental to map the mind. Psychologists and philosophers have been trying to understand the mind for hundreds of years: Tim mapped it in under three (plus a lifetime of prior experience).
