ANOTHER WORLD, OR THE FOURTH DIMENSION

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. By the help of certain mathematical analogies, cleverly put, Dr. Schofield points out the impossibility of guessing the direction of Heaven and Hell, as up above or down below. There is another world, close to us, but necessarily invisible, and the scriptural way of entering the Kingdom of God is the only way possible. - The Bookseller Verily the doctrine of the existence of another world must be in a parlous state if it requires bolstering up by an appeal to the metageometrical vagaries of Lobatschewsky, Riemann Co.; and yet it is pangeometry that Dr. Schofield invokes as a proof of the truth of Christianity! He quotes from that clever little skit Flatland with as much confidence as he might from Balfour Stewart s Conservation of Energy, and as though the result of juggling with symbols of the pangeometers necessarily had some corresponding entity in the cosmos. How can he, or any other human being, assume the identity of an algebraic multiple with a spatial magnitude! We employ algebraic quantities of the first, second, and third degrees to denote geometrical magnitudes of one, two, and three dimensions respectively; and, therefore, say the fourth-dimension gentry (or must say if they consistently adhere to their own principles), there must be geometrical magnitudes of four, five, six and so on to n dimensions corresponding to algebraic quantities of the fourth, fifth, sixth, and nth degree! For this, put nakedly, is every atom of evidence that we possess for the existence of the fourth dimension. Try again, Dr. Schofield. - Knowledge, Volume 11.
